UCB Mathematics. Learn about the people and activities that make UC Berkeley one of the best places in the world for advanced research, graduate and undergraduate study in mathematics.

mathematics was therefore designed to place the real-life use of mathematical knowledge and skills closer to the centre of a concept of mathematics learning. The intention is to encourage an approach to teaching and learning mathematics that gives strong emphasis to the processes associated with confronting problems

By studying mathematics, you'll be introduced to fundamental fields—algebra, real and complex analysis, geometry and topology—and to the habit of mathematical thought. Our curriculum includes courses in calculus, linear algebra, abstract algebra, real and complex analysis, topology, differential geometry, differential equations, number theory, combinatorics, statistics and probability theory.

The National Science Foundation/Division of Mathematical Sciences (NSF/DMS) now supports eight mathematical sciences institutes in the United States; 2 other entities heavily involved in the mathematical sciences include the Clay Institute for Mathematics, the Simons Center for Geometry and Physics, and the Kavli Institute for Theoretical Physics.

Mathematics in Education and Industry (MEI) MEI is committed to improving mathematics education and promotes teaching and learning through different strands of activity. We support teachers through a range of professional development opportunities, including our annual conference. Innovative resources are continually being developed to extend ...
