30/5/2012 · We just bought a 2001 MDX and are replacing the LCA's right at this moment. We were able to get the RW and FW bushings entirely in place by (after wedging them mostly into place) reconnecting the wheel and lowering the car til it had weight on the wheel and then pulling on the arm with a tow strap til it popped in (because putting a jack under the ball joint didn't seem to work well enough).

The trailing arm bushing cushions and eases the movement associated with suspension travel while firmly holding the wheel on its correct axis. If the trailing arm bushing is worn or cracked, the trailing arm can't hold the rear wheel solidly on its axis, which can cause excessive tire wear on the affected rear wheel, a loose feeling when driving, cornering, braking, or accelerating, and ...
