ABC and its variations are initialism mnemonics for essential steps used by both medical professionals and lay persons (such as first aiders) when dealing with a patient. In its original form it stands for Airway, Breathing, and Circulation. The protocol was originally developed as a memory aid for rescuers performing cardiopulmonary resuscitation, and the most widely known use of the ...

Defibrillation is a treatment for life-threatening cardiac dysrhythmias, specifically ventricular

fibrillation (VF) and non-perfusing ventricular tachycardia (VT). A defibrillator delivers a dose of electric current (often called a counter-shock) to the heart. Although not fully understood, this process depolarizes a large amount of the heart muscle, ending the dysrhythmia.

Lack of support and understanding of the scope of practice of nurse practitioner's is a barrier to professional success (Freenstra, 2014). It may cause increased difficulty adjusting to a new role as provider if the position was accepted into an organization that is new to having nurse practitioners.  
Long-term Goals

Physician Assistants (PA) are licensed health care professionals who practice medicine in collaboration with an MD or DO. PAs in conjunction with their collaborating physician provide patient care by obtaining histories, performing physical examinations, diagnosing injuries and illnesses, prescribing, assisting in surgery, educating patients on prevention as well as their conditions, and ...

Download PDF version Failure of health care providers to communicate effectively and appropriately with people with disabilities is a major barrier to delivery of quality health care for people with disabilities.
