Related work In recent work [22], an abstract argumentation framework has been used as a basis for defining an unifying proof theory for various argumentation semantics of logic programming. In that framework, well-founded semantics for NLP is computed by using an argument-based approach, which has many similarities with DeLP [7].

A Defeasible Logic Programming Based Framework To Support Argumentation In Semantic Web Applications Springer Theses ford 6600 ficha tecnica, new additional mathematics marshall cavendish pdf, e the story of a number, advances in agronomy Page 6/9.
