- M-theory is eleven-dimensional.
- Our world is part of the D-branes.
- The AdS/CFT correspondence is a remarkable physical equivalence between a certain four-dimensional gauge theory and a closed superstring theory.
- String theory has made good strides towards a statistical mechanics interpretation of black hole entropy. 3

A First Course in String Theory. Solutions for problems in Part I. The following pages contain the solutions for all the problems to be found in Part I of the textbook A First Course in String Theory. The handwritten solutions are all due to Jeffrey Goldstone. They are clear and elegant, and I hope that he will publish them someday.

This section provides lecture notes for the course. These lecture notes were prepared in LaTeX by Bryan Owens, an MIT student. He used handwritten notes taken in class by Kayla

Jacobs, an MIT graduate, in producing them. Professor Zwiebach has not thoroughly proofread these notes but believes they will be useful to people that want to know what goes on during lecture and what material gets ...

This course introduces string theory to undergraduate and is based upon Prof. Zwiebach's textbook entitled A First Course in String Theory. Since string theory is quantum mechanics of a relativistic string, the foundations of the subject can be explained to students exposed to both special relativity and basic quantum mechanics. This course develops the aspects of string theory and makes it ...

When, in the fall of 2001, distinguished string theorist Professor Barton Zwiebach ?rst proposed to the Physics Education Committee a new elective for the Department’s undergraduate curriculum based upon his upcoming textbook,“A First Course in String Theory,”the response was a moment of startled silence. How,the Committee members wondered,

- String Theory
- Each particle is identi?ed as a particular vibrational mode of an elementary string.
- String theory does not have adjustable dimensionless parameters.
- The dimensionality of spacetime is ?xed.
- There are two kinds of strings: open strings and closed strings.
