The IATA Airport Development Reference Manual (ADRM) is the industry’s most important guide for airlines, airports, government authorities, architects and engineering consultants who are either planning new or extending existing airport facilities.

The Airport Layout Plan (ALP) serves as a critical planning tool that depicts both existing facilities and planned development for an airport. Sponsors of airport development carried out at federally obligated airports must accomplish the improvement in accordance with an FAA-approved ALP. By definition, the ALP is a plan for an airport that shows:
