3 Optimize your results by combining chromatography techniques You can achieve significant improvements by using a combination of different chromatography techniques.

ÄKTAprocess is a versatile platform providing thousands of configuration possibilities. The system is available in three flow rate ranges that extend up to 2000 L/h. Versatile configuration with UNICORN control. Post-purchase configuration increases usability and lifespan.

AKTA Explorer systems include an extensive column library with details of run parameters for each pre-packed column. When the user selects a column, the AKTA Explorer instinctively sets the column volume, flow rate and pressure limit parameters into the method template. This automatic configuration protects the system from damaging events including over pressure.
