The American Society of Mechanical Engineers has both a tradition and a solid record of encouraging and supporting historical publications, particularly in the field of biography but also in the history of technical achievements.

A series of tests have been carried out to investigate the flow in a Compressor Outlet Guide Vane (OGV) blade row downstream of a single stage rotor. The subsequent flow field that developed within an OGV passage was measured, at intervals of 10% axial chord, using a novel design of miniature 5 hole pressure probe. In addition to indicating overall pressure levels and the growth of regions ...
