performing any wiring operations, review all contents of the users manual and de-energize the MAINS power switch. Only qualified personnel should perform installation wiring. Installation wiring must comply with all local and national electrical codes. Warning: Failure to ground the enclosure creates a possible shock hazard.

This is the build guide for the Amp Camp Amp v1.6. The differences between the 1.5 and 1.6 are fairly minor - the circuit is identical to the previous version, all the parts other than some chassis mounted components are the same. The schematic is the same, and part numbers are the same. The biggest changes are a different layout of the PCB ...
