Introduction to Radio Astronomy What is Radio? Radio is part of the Electromagnetic Spectrum (EM) along with Light. The Electromagnetic Spectrum Whenever an electric charge changes speed or direction it gives off an electromagnetic (EM) wave. How fast the wave 'wiggles' determines what kind of EM radiation is created.

Radio Astronomy Introduction Introduction to the third edition by the Chairman of ITU-R Working Party 7D (Radio Astronomy) It is an honour and privilege to present the third edition of the Handbook – Radio Astronomy, and I do so with great pleasure.

Introduction to Radio Astronomy Dr. Grant R. Denn Metropolitan State University of Denver. Undergraduate Alfalfa Workshop 2017

Radio astronomy is the study of natural radio emission from celestial sources. The range of radiofrequencies or wavelengths is loosely defined by atmospheric opacity and by quantum noise in coherent amplifiers. Together they place the boundary between radio and far-infrared astronomy at frequency ≈ 1 THz ($1 \text{ THz} \approx 10^{12} \text{ Hz}$)

RAL10 started many fans to radio astronomy. Students, amateur astronomers, radio amateurs, schools and universities, have built their small radio telescopes to start exploring the "radio-sky." We have received appreciation and new requests, gave answers and supported enthusiasts organizing events and conferences in many cities.

1. INTRODUCTION 1.1 The Role of Radio Observations in Astronomy. The data give for the coordinates of the region from which the disturbance comes, a right ascension of 18 hours and declination of -10° . Karl G. Jansky Jansky's discovery of radio emission from the Milky Way is now seen as the birth of the new science of radio astronomy.

Radio astronomy is astronomy done through this window. The long wavelength end is produced by the Earth's ionosphere.

Topic: Radio Astronomy (5 lectures) Lecturer: Dr James Chibueze Description: An introduction to the fundamentals of radio astronomy and radio interferometry. The emission processes, their detection techniques as well as hands-on 'lecture' on radio astronomical data handling will be covered.
