training of working dogs throughout much of its history. This theoretical perspective on working dog training emphasises the processes of habituation, classical and instrumental conditioning, and extinction. Habituation is the gradual loss of responsiveness to a stimulus as a result of repeated exposure to that stimulus.

Animal nutrition is an important factor limiting livestock productivity, and feed costs are considered as the main constraint to raising income from small-scale ruminant production in dry areas. ICARDA's livestock scientists are searching for alternative feed resources to be included in well balanced diets that can lead to improvements in flock productivity and in meat and milk quality.

ANIMAL NUTRITION AND FEEDING LECTURE CONTENT I. Introduction – Animal Nutrition – The Function of Feeds – Relationship between animal and its feed – The Digestive System I. ANIMAL NUTRITION • NUTRITION is the study of the body's need and mechanism for acquiring, digesting, transporting and metabolizing nutrients • The purpose of nutrition is to provide animals with nutrients ...
