Some ants are aggressive. All ants are insects. Therefore, some insects are aggressive. 14. All plumbers use monkey wrenches. Some mechanics don't use monkey wrenches. Hence, some mechanics aren't plumbers. 15. All spies are secretive. Some agents aren't spies.

Therefore, some agents aren't secretive.

the insect head can be found in the mouthpart module. Six or seven segments are condensed to form the head capsule. This strong structure provides protection for the brain, support for eyes, ocelli, antennae and mouthparts. The strongest muscles in the head serve the mandibles in chewing insects and the sucking pump in piercing-sucking insects.

Ants are the longest living insects. In Gainesville, the ant preyed upon small beetle larvae and lepidopterous larvae from the cultures of insects in quarantine. The ant is also reported as a significant predator of the twospotted mite, Tetranychus urticae Koch, in greenhouses (Osborne et al. 1995). Detection The ant is easily recognized due to its peculiar color markings and ...

Many plants – including the ones listed – give off a strong scent to repel ants and other insects in the wild, and it works just as well in home [2]. Cucumber/Citrus Peels leaving in the areas shows ant activity. Cucumber and citrus peels are toxic to the types of fungi that ants feed on, and therefore
