I will test the strength, power, and weaknesses of all monsters I create. Better to pull back and send two monsters next time than lose one due to simple poor planning.

Experiments requiring a human test subject shall be performed on kidnapped anti-social bums who live alone in large cities, not someone who people will notice the disappearance of, like a female student at the local high school.

Relaxed constraint and functional

divergence of the ...

17/4/2020 · However, this study did not explicitly test whether the dN/dS rate was significantly greater than 1, and while a branch-sites test identified a proportion of sites as potentially positively selected (17%, $dN/dS = 5.5$), the null hypothesis could not be rejected (LRT $P = 0.22$).
