4. Follow on screen prompts to ? ash bike INITIALIZING AUTOTUNE The Autotune feature utilizes your stock O2 sensors by setting your air fuel ratio table into closed loop operation and calibrating the front and rear volumetric ef? ciency tables (aka VE tables). Autotune will use your selected base map as a starting point to begin calibrating ...

Tuning is performed using either the autotune or manual tune features. The autotune program described in this section adjusts the MS for good performance over the entire mass range and is recommended for most applications. Manual tune allows you to adjust an MS tune parameter while viewing the results easily in profile scans and spectra.
