Oracle Berkeley DB provides the best open source embeddable databases allowing developers the choice of SQL, Key/Value, XML/XQuery or Java Object storage for their data model. At its core is a fast, scalable, transactional database engine with proven reliability and availability.

InfinityDB Embedded Java DBMS is a sorted hierarchical key/value store. It now has an Encrypted edition and a Client/Server edition. The multi-core speed is patent-applied-for. InfinityDB is secure, transactional, compressing, and robust, in a single file for instant installation and zero administration.

Java is a set of computer software and specifications developed by James Gosling at Sun Microsystems, which was later acquired by the Oracle Corporation, that provides a system for developing application software and deploying it in a cross-platform computing environment. Java is used in a wide variety of computing platforms from embedded devices and mobile phones to enterprise servers and ...

To what level do PDF files created with the Jasper Library support the features provided by PDF 1.4? hokkaido-hashii (2) 1 week 8 hours ago. JasperReports® Library. 0 votes. ...
