**Design-Build Advantages / Disadvantages** The design build process is a construction project delivery system that appoints a single sole member full responsibility to design and build a construction project. This method is employed in both new home construction and home renovation as an alternative to the traditional design-bid-build method.

**Design-Build Contract** A design-build contract is appropriate when the project delivery method is design-build. Traditional contracts are awarded using a design-bid-build system, where the project owner starts by hiring an architect. Once the architect has finished the design phase, the project is put out for bid to general contracting companies.
