Options models. Discounted cash flow models, no matter how modified, have limitations. All possible outcomes are assumed known, the probability of each outcome is known, and the value of each outcome is known. Also, most troublesome, is the selection of the discount rate which has a powerful effect on economic benefits.

Algorithmic trading - Wikipedia

Algorithmic trading is a method of executing orders using automated pre-programmed trading instructions accounting for variables such as time, price, and volume. This type of trading attempts to leverage the speed and computational resources of computers relative to human traders. In the twenty-first century, algorithmic trading has been gaining traction with both retail and institutional traders.

Subprime mortgage crisis - Wikipedia

The United States subprime mortgage crisis was a multinational financial crisis that occurred between 2007 and 2010 that contributed to the 2007–2008 global financial crisis. It was triggered by a large decline in US home prices after the collapse of a housing bubble, leading to mortgage delinquencies, foreclosures, and the devaluation of housing-related securities.
