Long-term Care in China: Public Response to the Ageing Society Yun Zhou and Dandan Pang 2 1. Background Due to social development generally and population policies specifically, China is experiencing unprecedented population ageing. In the 1970s, 3.8% of the population was over age 65 but

Undoubtedly, ageing will present challenges to the health-care system, given the larger number of older people, the fact that many health conditions and associated disability become more common with age, and that older people are higher users of health services.

the Healthy Ageing Strategy. Its predecessor, the Health of Older People Strategy, was launched in 2002. The 2002 strategy delivered many successes, including greater choice in long-term health care services. We can all be proud of that. However, the social and demographic picture in our country has changed over the past 14 years. In 2002,

A health care system focused on preventing disease could mean that work and income need not pivot around saving for future health and long-term care costs. Moreover, fewer people of all ages would need to leave the workforce or pay others to care for loved ones with failing health. This could lead to a more

5/2/2018 · Systems of long-term care are needed in all countries to meet the needs of older people. This requires developing, sometimes from nothing, governance systems, infrastructure and workforce capacity. WHO's work on long-term care (including palliative care) aligns closely with efforts to enhance universal health coverage, address non-communicable diseases, and develop people-centred and ...
