Group work frequently involves transitions

Read Clariant Fluid Release Document

between periods of active collaboration and periods of individual activity. We aim to support this typical work practice by introducing four tabletop direct-manipulation interaction techniques that can be used to transition the status of an electronic document from private to group-accessible. After presenting our four techniques – release, relocate ...

petroleum refineries could not document that the locations of control rooms, portable buildings, and other areas frequented by employees were adequately protected from fire, explosion, or toxic release. In many cases separating these structures away from the covered process will be protective;
