the objectives and sets up natural resource management organisations. (Weber, 1998) Stewardship People taking care of the earth... a range of private and public approaches to create, nurture and enable responsibility in users and owners to manage and protect land and natural resources. (Mitchell and Brown, 1998) Shared production regimes

Co-management acknowledges pragmatic developments and progression of institutional choice theories in natural resource management. This innovative concept embraces a pluralistic management approach based on the principle of subsidiarity and creates opportunities for the reconciliation of competitive property claims. This article reviews definitions of co-management, distinguishes it from other ...

A number of regional reviews of co-management have been published such as McCarthy et al. [Protected areas in Central America UICN] 1997, Nuñez 2000 [Civil society participation in Pas of Central America], Luna 1999 [Comanagement of PAs Central America], Girot 2001 [Sustainable use of Natural Resources in Central America], Gutierrez et al. 2000 [Review of community wildlife management in ...

Under Timor-Leste's regulatory framework there are provisions for co-management of natural resources between local communities, district and national governments. However, application of this framework has been limited, and guidance for practical application of the co-management ...

Abstract Natural resource management issues are increasingly viewed from the complex systems theory. There is general consensus among scientist that complex systems are not amenable to conventional resource management approaches that stresses on command-and-control. This has triggered a search for novel governance approaches that are more suited to complexity and uncertainty. Adaptive co ...

Initiating a participatory process in co-management of natural resources requires sensitivity and flexibility. Facilitators and trainers need to offer as much support guidance and encouragement as necessary while still maintaining a low profile, in the process. Enhancing a . 8

1.11 Where natural resources are managed as part of or after a Treaty settlement, co-governance often means that there are equal numbers of iwi representatives and council members involved. Usually (an exception is the Waikato River Authority), councils retain national decision-making powers over the management of natural resources.

Nevertheless, most definitions of co-management have

In this context, co-management, where management responsibility is shared between government and resource-users, may improve the suitability and perceived legitimacy of management rules. However, despite the potential for such arrangements to improve the resilience of natural resource systems, how co-management works remains poorly understood.

Initiating a participatory process in co-management of natural resources requires sensitivity and flexibility. Facilitators and trainers need to offer as much support guidance and encouragement as necessary while still maintaining a low profile, in the process. Enhancing a . 8
