2012 in science - Wikipedia

The year 2012 involved many significant scientific events and discoveries, including the first orbital rendezvous by a commercial spacecraft, the discovery of a particle highly similar to the long-sought Higgs boson, and the near-eradication of guinea worm disease. A total of 72 successful orbital spaceflights occurred in 2012, and the year also saw numerous developments in fields such as ...

Like many other services, Taco Bell relies on its operations management to improve productivity and reduce cost. Its menu and meals are designed to be easy to prepare. Taco Bell has shifted a substantial portion of food preparation to suppliers who could perform food processing more efficiently than a stand-alone restaurant.
