The rationale, a definition of key terms, and each element of our suggested approach will be discussed in detail in the pages that follow. However, we have outlined the overall approach below in order to present the context and “end game” for the IT risk and control evaluations. The overall approach can be depicted as follows: IT Organization

• An interdisciplinary approach that encompasses the entire technical effort, and evolves into and verifies an integrated and life cycle balanced set of system people, products, and process solutions that satisfy customer needs. (EIA Standard IS-632, Systems Engineering , December 1994.) • An interdisciplinary, collaborative approach that

Protection implies a "top-down" approach. It recognises that people face threats that are beyond their control (e.g., natural disasters, financial crises and conflicts). Human security therefore requires protecting people in a systematic, comprehensive and preventative way. States have the primary responsibility to implement such a protective ...
