This paper presents a critique of expected utility theory as a descriptive model of decision making under risk, and develops an alternative model, called prospect theory. Choices

among risky prospects exhibit several pervasive effects that are inconsistent with the basic tenets of utility theory.

36 Theory and Practice of Online Learningfunction in the digital and networked age; however, further work needs to be done on how this theory can be used by educators to design and develop learning materials.CONCLUSIONThis chapter concludes by proposing a model, based on educational theory, that shows the important learning components that should be used when designing online materials.

In practice, an effective approach to time-critical dynamic decision modeling should provide explicit support for the modeling of temporal processes and for dealing with time-critical situations. One of the most essential elements of being a high-performing manager is the ability to lead effectively one's own life, then to model those leadership skills for employees in the organization.

Corporate finance for the pre-industrial world began to emerge in the Italian city-states and the low countries of Europe from the 15th century.. The Dutch East India Company (also known by the abbreviation “VOC” in Dutch) was the first publicly listed company ever to pay regular dividends. The VOC was also the first recorded joint-stock company to get a fixed capital stock.
