the years, America's well-being has been furthered by science and technology. Fears set off by the Soviet ...

The same can be also said for other exponentially growing technologies. To help Swiss manufacturing companies successfully manage the transformation to industry 4.0, we have devised a range of solutions geared to its four major characteristics, i.e. vertical networking, horizontal integration, through-engineering and exponential technologies.

Most engineering designs can be classified as inventions-devices or systems that are created by human effort and did not exist before or are improvements over existing devices or systems. Inventions, or designs, do not suddenly appear from nowhere. They are the result of bringing together technologies to meet human needs or to solve problems.
