Quantum information is the information of the state of a quantum system. It is the basic entity of study in quantum information theory, and can be manipulated using quantum information processing techniques. Quantum information refers to both the technical definition in terms of Von Neumann entropy and the general computational term.. It is an interdisciplinary field that involves quantum ...

16/7/2008 · Third, the emergence of our classical world is not merely a matter of environmental decoherence (e.g., Omnès 1994; Berry 2001; Wallace 2012). For one thing, there is no context-free limit of infinitely many degrees of freedom because this limit always has uncountably infinitely many physically inequivalent representations.

24/3/2002 · A world is the totality of macroscopic objects: stars, cities, people, grains of sand, etc. in a definite classically described state. The concept of a “world” in the MWI belongs to part (ii) of the theory, i.e., it is not a rigorously defined mathematical entity, but a term defined by us (sentient beings) to describe our experience.
