WebStation provides a portable, fully functioning user interface to access the Automation and Enterprise Servers using a web browser. Users can view and manage graphics, alarms, schedules, trend logs, and reports. User accounts can be created, edited, or removed. WebStation is built in with every Automation Server and Enterprise Server.

Automation developers are RPA specialists with fairly universal needs. While ease of use is very important, the ability to build and manage powerful, best-of-breed bots to enable massive productivity gains is a top priority. To do that, it's very important for developers to understand how the business user will leverage the system.
