intended to assist you in assessing which starter motor can be successfully be used on your vehicle, if you know the part number of the motor which should be fitted, you can compare features of similar units.

Lucas M50–M127: Setting Pinion Clearance. Pinion clearance is probably one of the least understood calibrations required in rebuilding starters. It is critical to the proper operation of Lucas M50 and M127 starters. These starters in particular, are the most difficult in which to set the precise clearance.
