Includes a PDF summary of 31 pages Description or summary of the book : Embodying advances in cognitive psychology since the publication of Bloom's taxonomy, this revision of that framework is designed to help teachers understand and implement standards-based curriculums as well as facilitate constructing and analyzing their own.

An introduction to economic applications of the theory of continuous-time finance that strikes a balance between mathematical rigor and economic interpretation of financial market regularities. This book introduces the economic applications of the theory of continuous-time finance, with the goal of enabling the construction of realistic models, particularly those involving incomplete markets.
