questions to be answered as a separate part of the lab report. They are hints. They are things for you to think about. Some of them should be addressed in your lab report. Not because your TA says to do so, but because it adds depth to your discussion. You are never to simply list answers to considerations. Endnotes:

1 Writing lab reports To write a successful scientific report you need to be clear about what you are trying to achieve. The main purpose of a scientific report is to communicate the finding from the work and to help the reader to understand them. The report should include a record of the process
