The Electronic Control Transmission is an automatic transmission which uses modern electronic control technologies to control the transmission. The transmission itself, except for the valve body and speed sensor, is virtually the same as a full hydraulically controlled transmission, but it also consists of electronic parts, sensors, an ...

NORD Gear supplies the larger C-face motor adapters with an Automatic Lubricator. This will provide additional grease lubrication to the outboard bearing. As the pressure from the lubricator canister pushes the new grease into the bearing, the old grease will flow into the cavity towards the gearbox.

Product line: transmission systems for full electric and hybrid vehicles Vehicle electric passenger vehicle Driveline layout rear wheel drive, rear transversal electric motor coupled with gearbox Product 1 speed transaxle Motor features Zytec 25 kW, max. speed 14000 rpm, max. torque 65 Nm Gearbox features double stage reduction total reduction ...

Manual transmission system :- In this type of transmission system , the driver has to manually select and engage the gear ratios :- Clutch fully depressed The clutch is fully disengaged when the pedal is fully depressed. There will be no torque being transferred from the engine to the transmission and wheels. Fully depressing the

sport program and manual gear selection by tiptronic. In triponic mode, it is possible to start in second gear. Dynamics and economy The 6-speed automatic gearbox 09G sets new standards in the segment of transversely mounted multi-step automatic gearboxes • Low weight • Wide ratio spread * • Compact gearbox dimensions • High shifting speed

Select first gear, release the clutch, and keep the RPM above idle speed. The display is blinking faster while the unit is learning the gear. - When the display shows “2”, select second gear. Repeat this

process until all gears are thought (5 or 6). In top gear, wait until “o” ...

(standard fifth wheel landing gear crank handle or 3/4” socket and ratchet fits on to allow the manual extension/retraction of the room, Fig. 4-5, page 8. Simply take the crank handle (through-frame models) or wrench, ratchet or drill with a nut driver (in-frame models) and rotate it clockwise to retract and counterclockwise to extend slide-out.

This PDF file is an updated version of our printed user manual P/N 07400209, that is packaged with stock models 0780, 0781, 0783 and 0784. Bodine type "WPM", filtered PWM speed controls for Permanent Magnet DC (PMDC) gearmotors and motors. Input: 115VAC +/- 10%, 50/60 Hz, single-phase. Output: 0 ...
