1/3/2016 · These guidelines refer to patients undergoing elective endoscopic gastrointestinal procedures. Management of antiplatelet therapy and direct oral anticoagulants (DOACs) in acute gastrointestinal haemorrhage is discussed in detail in European Society of Gastrointestinal Endoscopy (ESGE) guidelines on the management of acute non-variceal upper gastrointestinal bleeding.¹

Tropical chronic pancreatitis is a
multifactorial juvenile (2nd and 3rd
decades) form of chronic calcific
pancreatitis, usually seen in developing
countries in the tropical region, which
includes the southern part of India.
Radiologists should be aware of this
condition for the purposes of early
diagnosis and better management of these

8/11/1997. Chronic pancreatitis is an inflammatory disease in which progressive and irreversible structural changes to the pancreas result in a permanent impairment of both the exocrine and endocrine functions.¹ By contrast, the histological changes in acute pancreatitis revert to normal after the acute attack resolves. Pancreatic histology is rarely available and distinguishing between acute and chronic ...
