ASME Y14.5 is a standard published by the American Society of Mechanical Engineers (ASME) to establish rules, symbols, definitions, requirements, defaults, and recommended practices for stating and interpreting Geometric Dimensions and Tolerances (GD&T).

Typically, an ASME Y14.5M drawing will have block (or shop) tolerances called out on the part, and these are in no way standardized in Y14.5M. Part 11 of ISO 10110 is an attempt to guarantee that no optical element will be manufactured to looser tolerances than specified in the standard unless specifically called out in the drawing.
