18/9/2018 · Definition: Watson’s Theory of Care Jean Watson is a nursing theorist who formulated the

theory of human caring and the 'caritas' processes in support of this theory. Watson's background is in nursing and psychology. Through her practice, she observed the effect of authentic caring on patients and the resultant health outcomes.

This required core course for the Doctor of Nursing Practice program provides an understanding of the use of theory and conceptual foundations to guide the complexity of specialty nursing practice at the doctoral level. The content is derived from the philosophical and scientific underpinnings of nursing, natural, and psycho-social sciences.

The doctor of nursing practice (DNP) is a degree in nursing. In the United States, the DNP is one of two doctorate degrees in nursing, the other being the PhD (doctor of philosophy). The curriculum for the DNP degree builds on traditional master's programs by providing education in evidence-based practice, quality improvement, and systems leadership.

Neuman system model is a grand theory, (with a broader scope) which consists of global conceptual framework. It defines . broad perspectives for nursing practice and includes diverse ways of viewing nursing phenomena that base on these perspectives. It provides a comprehensive foundation for scientific nursing practice, education and research.

As the research progressed, Norton and Bowers described theoretical sampling of types of providers (nurses and physicians), work settings (home health, family practice, oncology, and intensive care), and work experience (experienced or novice, in terms of number of years of experience as a healthcare provider and experience with patients who were dying).
