financial statement analysis plays the same role in the decision-making process. Whereas management uses the analysis to help in making operating, investing, and financing decisions, investors and creditors analyze financial statements to decide whether to invest in, or loan money to, a company.

The Financial Statements Three financial statements are critical to financial statement analysis: the balance sheet, the income statement, and the statement of cash flows.

Financial statement analysis is the application of analytical tools and techniques to general-purpose financial statements and related data to derive estimates and inferences useful in business analysis. Financial statement analysis reduces one's reliance on hunches, guesses, and ...
