10/12/2020 · 1. Introduction. Coal has historically been a major contributor to economic growth of many countries as a key source of energy. However, the natural friability, mechanized mining, handling system and size reduction methods have led to increase in production of coal fines (Hacifazlioglu, 2012). Statistics show that over 30 billion metric tons of coal are available in the top 10 coal producing ...
