The fuel injection pump supplies fuel under high pressure to the injectors through high pressure pipes. The injectors atomise the fuel and inject it into the combustion chamber of the engine. The fuel injection pump is fed with fuel in abundance. The excess fuel is by-passed to the intake side of the fuel transfer pump through a relief valve.

lower engine speeds. Gasoline and Diesel Fuel Injection: Operation, Diagnosis, and Service 671 as a safety feature. A one-way check valve is also built into the pump outlet to prevent any fuel pressure in the lines or rail from bleeding back through the pump. Fuel Filter The fuel filter is a very important service item. See Figure 29–3.

Fuel Pump Top Cover L/S35MC, S46-50-60-70MC-C (Fuel pumps without VIT) Action Code: AT FIRST OPPORTUNITY Dear Sirs Since the introduction of the S-MC-C engines in 1997, a few cracks have been experienced on fuel pump top covers. The cases experienced indicate that such incidents occur, if at all, rather early in the engine lifetime.

This fuel pump is intended strictly for automotive use. Not approved for aircraft or marine use. REMOVAL Your new replacement fuel pump may slightly differ from the original equipment fuel pump found on the vehicle. These minor modifications will not alter or change operation once mounted to the engine...

The injection pump sends fuel under pressure to the nozzle pipes which carry fuel to the injector nozzles located in each cylinder head. Excess fuel goes back to the fuel tank. CI engines are operated unthrottled, with engine speed and power controlled by the amount of fuel injected during each cycle.

13/7/2016 · For Cat engine fuel systems, a minimum viscosity of 1.4 cSt at 38°C (100°F) is required at the engine transfer pump to properly lubricate fuel system components. Kerosene type fuels have lower energy content than diesel fuels and therefore will produce less peak power output and/or will require more fuel volume

The basic fuel supply system in an automobile petrol engine consists of a fuel tank, fuel Lines, fuel pump, fuel filter, air cleaner, carburetor, intake manifold. For the supply of fuel from fuel tank to engine cylinder following fuel feed systems are used: Gravity system. Air pressure system.
