“With Revolution EVO, we are achieving the lowest possible dose without reducing the consistency of imaging.” For example, ICH previously used prior generations of iterative reconstruction for low-dose imaging.

Obtain fast, high-quality images and avoid patient and staff disruptions. 0.28 mm spatial resolution. High resolution, low-contrast detectability, and less noise and/or artifacts are crucial to clinical imaging. The newly developed Clarity imaging chain holds enormous potential to enable high resolution imaging for your daily routine.

Revolution EVO features the latest SMART Technologies Better patient care, improved efficiency, expanded applications. Smart Technologies is a suite of intelligent CT tools designed to help you achieve these goals, delivering diagnostic confidence with lower levels of radiation 4 .

Revolution EVO is designed with the purpose of operating in the reality of now, while anticipating the challenges of tomorrow. Learn more.
