24/3/2014 · In the Gibson Robot Guitar, the fourth knob is replaced with a MCK (master control knob) commonly referred as “push/pull knob” which gives the guitar its unique characteristics. When the MCK is pushed, it acts as a regular knob that control the tone of the microphone (like a common Gibson guitar), but when it is pulled, the function of auto-tuning is activated.

Users on the Gibson website forum have remarked about problems with even new guitars. One forum user stated, “I have had the guitar for one week, played it for at least 20+ hours and the G-Force tuners have presented me with nothing but problems. The last straw was at rehearsal last night and the guitar was out of tune more than it was in tune.
