15/6/2001 · GM Installation: The correct location on most GM V8-engines to install the oil pressure sender is under the distributor housing at the rear of the block. Use the 2 piece bushing kit provided to allow the sender to be mounted at a 45-degree angle pointing towards the

GM Inline Engines This chapter covers the GM 153 and 181 cid 4-cylinder engines and the GM 194, 230, 250 and 292 cid 6-cylinder inline engines used on MerCruiser 110 through 200 models. Although differing in displacement, these engines are essentially the same design with many interchangeable parts. These engines are used with the following

“General Motors of Canada Limited” for GMC Division wherever it appears in this manual. If the vehicle has the Duramax® Diesel engine, see the Duramax diesel supplement for additional and specific information on this engine. If the vehicle is a hybrid, see the hybrid supplement for more information. Keep this manual in the vehicle for ...

Like all small block V-8 engines produced since 1986, the 350 HO engine has a 3.00” diameter flywheel flange bolt pattern. Small block V-8 engines produced from 1958 through 1985 had a 3.58” diameter flywheel flange bolt pattern. This change in bolt circle diameter was made to accommodate a leak-resistant one-piece rear main seal.

This manual is a reproduction of a General Motors Powertrain publication and contains information pertaining to industrial generator set engines. engine also has a secondary filter. The primary filter for the 6.2 liter engine is mounted to the cowl. A drain petcock is located on the top and bottom of the filter. Opening these petcocks will drain any water accumulated in the filter. A short length of hose is attached to the lower petcock to direct fluid away from the engine compartment.
