1 day ago · Avoided crossings are important in many waveguides and resonators. That is particularly the case in modern-day solid-core and air-core optical fibers that often have a complex geometry. The study of mode coupling at avoided crossings often leads to a complicated analysis. In this tutorial, we aim to explain the basic features of avoided crossings in a simple slab waveguide structure so that ...

Serving the whole of the optics community, Journal of Optics covers all aspects of research within modern and classical optics.

Laser Physics is an international journal covering the fundamental and applied aspects of laser science. The journal was founded in 1990 on the initiative of Alexander M Prokhorov, Nobel Laureate in Physics. Published by IOP Publishing on behalf of Astro Ltd.
