provide more training to health-care workers in this area has become increasingly evident. Existing training materials need to include more detail to help clinicians recognize the evolution of the course of dengue disease in its various forms of severity, and to enable them to apply the knowledge and principles of management accordingly.

The risk management information in this handbook does not duplicate or replace AS/NZS ISO 31000:2009 Risk Management , but is designed to provide some further healthcare-relevant information and guidance, and focuses on risk management systems.
