1 INTRODUCTION TO DATABASE SYSTEMS Exercise 1.1 Why would you choose a database system instead of simply storing data in operating system files? When would it make sense not to use a database system? Answer 1.1 A database is an integrated collection of data, usually so large that it has to be stored on secondary storage devices such as disks or tapes.

Midterm Exam: Introduction to Database Systems: Solutions 1. Entity-Relationship Model [16 points]
Below is the preferred solution: The following variants were also accepted: a. [12 points] Complete the diagram above to be a valid E-R diagram reflecting the following constraints. (Be ...

Solutions to Exercise 2-7: Sorting Data Use the AdventureWorks2008 database to complete the exercise to practice sorting the results of your queries. 1. Write a query that returns the business entity ID and name columns from the Person.Person table. Sort the results by LastName, FirstName, and MiddleName.

Winter 2011 CSE-3421 Exercises w/ answers p. 2 of 28 2. The House Database You have just moved to Washington, D.C., to work for the U.S. House of Representatives (the “House”) as a database specialist. For your first job, they want you to design a database to keep track of votes taken in the House. (A counterpart to you working for the U.S ...

Reading skills practice: Interview with Henry Smiles – exercises Check out this interview with Henry Smiles from the band Two Direction and complete the tasks to practise and improve your reading skills. Preparation Match the vocabulary with the correct definition and write a–f next to the numbers 1–6.

6.26 Specify queries c, d, and e of Exercise 6.18 in both tuple and domain relational calculus. Answer: (c) For each section taught by professor King, retrieve the course number, semester, year, and number of students who took the section. This query cannot be done in basic relational calculus as it requires a COUNT function.
