Foundations of mathematics is the study of the philosophical and logical and/or algorithmic basis of
mathematics, or, in a broader sense, the mathematical investigation of what underlies the philosophical
theories concerning the nature of mathematics. In this latter sense, the distinction between foundations of
mathematics and philosophy of mathematics turns out to be quite vague.

Developmental psychology initially focused on childhood development through Jean Piaget's four stages
of human cognitive development, the last stage of which is known as the formal operational
stage. Extending developmental psychology to adults, most neo-Piagetian theories of cognitive
development have posited one or more stages of postformal thought.
