Firing Rate Gas Valve PRODUCT HANDBOOK APPLICATION. The V5197A are firing rate valves used to provide variable flow control of air, natural gas, liquefied petroleum (LP), and manufactured gases. The V5197A are actuated by a firing rate motor that can be mounted directly on the valves. The V5197A is not applicable as a safety shutoff valve.

Gas Controls APPLICATION These intermittent pilot gas controls are used in gas-fired appliances with up to 415 ft³/hr capacity at 1 in. wc pressure drop (8.5 m³/hr at 0.25 kPa) on natural gas. They include safety shutoff, a manual valve, two automatic operators, a pressure regulator and a pilot adjustment.

Honeywell's HSV086 series consists of a number of effective safety shut-off valves for use in gas transmission systems, gas distribution networks and industrial gas pressure regulating systems. The HON HSV086 has demonstrated its quality and usability for more than 25 years. The HON HSV086 has been improved and modified according to

83Point Network Gas Monitor User Manual E Introduction E3Point is: Energy Management, Efficiency, and Economic value. E3Point is a toxic or combustible gas detection system that integrates the best functionalities from well-known Honeywell Analytics products, such as the 201T and 301M), Although new and innovative, E3Point is still compatible with the features offered in these products.

Notes: All piloted valves have a 1/4" compression fitting. All the VR valves come set for natural gas, but can be converted to LP gas. The VS820A1054 is for natural gas. The VS820A1336 is for LP gas. All the VR valves have inlet and outlet pressure taps. The VS820 valves have just an outlet pressure tap. Minivolt Gas Valve Trade Replacements

A valve position indicator (H) indicates that the valve has closed. In the closed position, gas pressure acts upon the valve ensuring positive lock up. In order to re-arm the valve this pressure must first be equalized across the valve if damage to the mechanism is to be avoided. In the Series 100 Slam Shut this is AUTOMATICALLY achieved when

pipe to any appliance where gas and air are mixed. • Failure to fit non-return valves in these circumstances can result in an explosive gas/air mixture being formed within the pipework. Honeywell non-return valves, which give a positive seal under all conditions of reverse pressure up to 7 barg, provide complete protection from such explosions.

gas valves Honeywell has taken the guesswork out of gas valve selection with our complete line of universal gas valves. Contractors appreciate the reliability, ease of installation and time saved by carrying a select few gas valves on their truck. Honeywell gas valves — the right choice every time.
