### **Work?**

*15/6/2016 · Paper chromatography is used as a qualitative analytical chemistry technique for identifying and separating colored mixtures like pigments. It is used in scientific studies to identify unknown organic and inorganic compounds from a mixture.*

### **Leaf chromatography | Experiment | RSC Education**

*On a strip of chromatography paper, draw a pencil line 3 cm from the bottom. Use a fine glass tube to put liquid from the leaf extract onto the centre of the line. Keep the spot as small as possible. Allow the spot to dry, then add another spot on top.*

## **Thin layer chromatography TLC**

*Thin Layer Chromatography. Thin layer chromatography, or TLC, is a method for analyzing mixtures by separating the compounds in the mixture. TLC can be used to help determine the number of components in a mixture, the identity of compounds, and the purity of a compound. By observing the appearance of*

*Attach the strip to the pencil with a piece of tape. Make sure the bottom of the strip hangs straight. Adjust the length of the filter paper strip so that the bottom just touches the green liquid in the cup. Checking every couple minutes, wait for the band of solvent to migrate to the top of the filter paper.*
