JIC fittings (aka SAE 37° tube fittings, flared fittings, or SAE J514 fittings) are the most popular hydraulic fluid connector in North America. While JIC fittings are often used for joining tubing in a hydraulic system, they are frequently used on hose as an end adapter for female JIC swivel fittings, which are the most common end connection for hydraulic hose assemblies.

Standards also help clients procure fittings that work effectively within the range of pressures they are designed for. SAE standards for hydraulic fittings include: SAE J514 - Hydraulic Tube Fittings. SAE J516 - Hydraulic Hose Fittings . Selection Tip: There are many factors that affect fitting performance at ...

Atlas Steels – Product Reference Manual Section 3 – Stainless Steel Pipe, Fittings & Flanges October 2016 Page 4 – Section 3 www.atlassteels.com.au Butt Welding Pipe Fittings A piping system using butt welding fittings has many inherent advantages over other forms. Welding a fitting to the pipe means that it is permanently leak proof

23/1/2021 · 6. Use 2 wrenches to unscrew the fittings securing the hose. Hydraulic hoses are usually secured by an attachment with 2 fittings that spin in opposite directions. Hold the fitting closest to the hose with one wrench. Then use the other wrench to loosen the fitting closer to the machine by turning it counterclockwise.

can also be used for connecting two fittings within small distance (Fig. 5.16). Trap It is a fitting in a P, U, S or J-shaped type (Fig. 5.17). Traps are fitted near a plumbing fixture.
