Culture-bound syndromes are usually restricted to a specific setting, and they have a special relationship to that setting. Because culture-bound syndromes are classified on the basis of common etiology (e.g., magic, evil spells, angry ancestors), clinical pictures may vary. Projection is a common ego defense mechanism in many non-Western cultures.

However, one resource that is common to all organizations, which has been the focus of increasing theoretical, empirical, and practical attention in small and medium-sized enterprises (SMEs), is ...

Adolescents' choice of music and their reactions to and interpretations of it vary with age, culture, and ethnicity. 2,13,14,18–25 Research has shown that there also is a difference in these variables between the genders. 25 Female adolescents are more likely than male adolescents to use music to reflect their emotional state, in particular when feeling lonely or "down." 2,26,27 Male ...

1/4/2016 · An increasing number of contemporary research publications acknowledge the influence of

religion and culture on sexual and reproductive behavior and health-care utilization. It is currently hypothesized that religious influences can partly explain disparities in sexual and reproductive …

107 Identity includes a person's name, gender, ethnic identity, family status, occupation, and roles. One's personal identity begins to develop during childhood and is constantly reinforced and modified throughout life. B. Body image is an attitude about one's physical attributes and characteristics, appearance, and performance.
