Synthesis Lectures on Human-Centered Informatics. ?. ?. We live in an "information age," but information is only useful when it is interpreted by people and applied in the context of their goals and activities. The volume of information to which people have access is growing at an incredible rate, vastly outstripping people's ability to ...

Interacting with information resources: ... As discussed by Attfield, Blandford and Dowell ... Simon Attfield, George Buchanan, Hanna Stelmaszewska and Claire Warwick on the topics covered in this paper. Anonymous referees made constructive suggestions for changes that have improved this paper.

Simon Attfield is a Senior Lecturer in the Interaction Design Centre, Middlesex University, UK. His research lies in the area of understanding how people work with information, processes involved in individual and collaborative sensemaking and implications for interactive systems design. With Ann

People's information needs may be explicit and clearly articulated but, conversely, may be tacit, exploratory and evolving. Widely used tools supporting information access, such as searching on the Web and in digital libraries, support clearly defined information requirements well, but they provide limited support for other information needs.

PDF | On Jan 1, 2013, David S Ebert and others published Magic Interactions with Information for Visual Reasoning | Find, read and cite all the research you need on ResearchGate
