Download Free **Interpreting Stereonets Structural Analysis** A modern quantitative approach to structural geology and tectonics for advanced students and researchers. A straightforward introduction to stereographic projection techniques for students of geology and civil engineering.

Equal-area stereonet are used in structural geology because they present no statistical bias when large numbers of data are plotted. On the equal-area net area is preserved so, for example, each 2 degrees polygon on the net has the same area. In structural geology the stereonet is assumed to be a lower-
