In the past, minors were not considered legally capable of making medical decisions and were viewed as incompetent because of their age. The authority to consent or refuse treatment for a minor remained with a parent or guardian. This parental authority was derived from the constitutional right to privacy regarding family matters, common law rule, and a general presumption that parents or ...

13/3/2018 · For example, generic versions of decision-support tools are available, such as the Ottawa Personal Decision Guide (a template that prompts the clinician and patient to discuss and complete a form with the options, their pros and cons, how much each pro or con

matters to the patient, available support, further decision-making needs, and next steps), alongside clinical encounter tools that aim ...

14/11/2018 · Objective Shared decision making (SDM) training is shown to be effective and is increasingly embedded in continuing medical education. There is little evidence, however, about undergraduate medical education for SDM. The aim of this scoping review was to identify existing SDM training embedded in the undergraduate medical curriculum and analyze their impact.

Decision making is a way of life for school administrators. Although everyone in a school makes some decisions, school administrators are paid to make decisions.
